Rashid Mehmood

Senior Full Stack Software Engineer

Dubai, UAE | +971508343662 | rashidpadda145@gmail.com
linkedin.com/in/rashid-mehmood-522411190 | github.com/rashidpadda

Senior Full Stack Software Engineer with 6+ years of experience designing and building scalable enterprise applications, high-volume data systems, and unified platforms for global markets. Strong expertise in Node.js, NestJS, React.js, Next.js, React Native, and TypeScript, with hands-on experience in microservices architecture, RESTful API design, API gateways, event-driven systems, data pipelines, and real-time processing. Proven track record designing system integrations, caching and messaging layers, and production-grade CI/CD pipelines for large-scale transactional and distributed systems. Experienced in Web3, DeFi, NFT platforms, and smart contract integrations, as well as IT infrastructure, network administration, and VoIP telephony systems. Comfortable working with cross-functional, international, and remote-first teams in Agile/Scrum environments.

SKILLS

Frontend Development: HTML5, CSS3, Sass, Styled Components, Tailwind CSS, React.js, Next.js, React Native, TypeScript, JavaScript, Redux, Redux Thunk, Context API, Material-UI, Bootstrap, Web3.js, Jest, Enzyme, WebSockets, SEO, SSR

Backend & Architecture: Node.js, NestJS, Express.js, RESTful APIs, Microservices, API Gateway, Event-Driven Architecture, Redis, RabbitMQ, gRPC, RBAC, OAuth2, SSO, MongoDB, PostgreSQL

Blockchain & Web3: dApp Development, Smart Contracts, Ethereum, Wallet Integration, NFT Marketplaces, DeFi (Staking, Lending, Trading), Meta Webhooks

Integrations & DevOps: Stripe Payments, PandaDoc API, CI/CD Pipelines, GitHub Actions, Docker, Real-Time Notifications, Analytics & Tracking

IT Infrastructure & Networking: Network Administration, Shared Network Resources, IP PBX / VoIP (Grandstream), FTP Server Administration, Email & Domain Configuration, Printer/Scanner Deployment, IT Troubleshooting & Support

Practices: Agile/Scrum, Jira, Trello, Code Reviews, Performance Optimization, Debugging, Testing, Monitoring & Logging

EXPERIENCE

Senior Full Stack Software Developer - SoftBuilders Software Design LLC

Business Bay, Dubai, UAE | 01/2024 - Present

Web3-based staking and rewards platform built with React.js, Node.js, and MongoDB, supporting decentralized licensing, machine connectivity, and high-volume user activity.

- Architected and developed the core platform and admin dashboard using React.js and Node.js, supporting decentralized staking, rewards generation, and license management.
- Gained experience building enterprise asset-centric platforms involving equipment management, licensing, machine connectivity, and operational workflows.
- Engineered RESTful APIs and microservices that manage assets, users, permissions, workflows, and system events, aligning with Maximo-style backend architectures.
- Designed and maintained a centralized API Gateway for routing, authentication, authorization, and rate limiting across the microservices layer.
- Built scalable microservices for high-volume data processing and real-time workflows, improving system reliability and performance under high user concurrency.
- Established data processing pipelines for handling large-scale transactional data, including validation, transformation, and integration across services.
- Built out modular React UI components for enterprise, asset-centric dashboards.
- Implemented Redis caching, RabbitMQ messaging, webhooks, and batch processing to support millions of transactions and users.

Delivered role-based access control (RBAC) dashboards with real-time data visualization and multi-level permissions.
- Integrated PandaDoc API to automate user onboarding and digital contract signing workflows.
- Configured ESLint and Prettier to enforce code quality and maintainability.
- Maintained shared network resources across internal computers, enabling seamless file sharing and centralized resource access for all staff.
- Set up and administered an internal IP PBX telephony system using Grandstream, enabling reliable internal and external voice communication across the organization.
- Deployed and managed networked printers and scanners, configuring shared access for multiple departments and reducing hardware duplication costs.
- Administered FTP server access for internal users, enabling secure file transfer and centralized document storage across teams.
- Oversaw email accounts and configurations for internal users, ensuring reliable communication and proper mailbox/domain configuration.
- Provided ongoing troubleshooting and support for network connectivity, telephony, and peripheral devices, minimizing downtime for end users.

Full Stack Software Developer - Aqary International Group

Abu Dhabi, UAE | 12/2023 - 01/2024

Enterprise-scale proptech platform supporting property sales, rentals, and exchanges across 10+ international markets.

- Built core screens, navigation, and API integration for the Aqary mobile app using React Native, working largely independently to ship features end-to-end.
- Shipped a responsive, SEO-optimized web frontend using Next.js, reducing page load times by 40% and improving rendering performance by 2x.
- Implemented dynamic routing, advanced search, and responsive UI components for property listings, applying SSR and SEO best practices across the platform.
- Architected scalable Node.js REST APIs for property listings, user management, search, and transactional workflows, shared across the Next.js web app and the React Native mobile app.
- Increased user engagement by 25% and conversion rates by 15% through performance and UX improvements.
- Applied code splitting and lazy loading techniques, reducing bounce rates by 18% and increasing average session duration.
- Added user behavior tracking and funnel analytics to enable data-driven targeting and conversion optimization.

Full Stack Software Developer - Big Immersive

Lahore, Pakistan | 02/2021 - 2023

NFT marketplace and Web3 dashboard managing 10,000+ users and 50,000+ blockchain transactions per month.

- Contributed to a React Native mobile app for the Virtua NFT marketplace, building browsing, trading, and wallet features as part of a cross-functional team.
- Developed secure Web3 trading features by integrating Ethereum smart contracts with a Node.js backend and Web3.js.
- Grew transaction volume by 40% while reducing transaction failures by 30%.
- Enabled Single Sign-On (SSO) across React frontend and Node.js services for seamless multi-platform authentication.
- Embedded Stripe payment processing, reducing payment errors by 25% and increasing successful transactions by 35%.
- Elevated frontend performance and enhanced UI scalability for NFT drops and high-traffic events.

Software Developer - Intagleo Systems

Lahore, Pakistan | 04/2019 - 2021

AI-driven recruitment solution automating candidate screening and interview scheduling.

- Crafted responsive, cross-browser-compatible user interfaces using React.js.
- Engineered and connected Node.js RESTful APIs supporting interview scheduling and candidate data workflows.
- Managed application state using Redux and Redux Thunk for predictable and scalable state management.
- Launched real-time chat and notification systems using WebSockets and SignalR, reducing response time by 60%.
- Collaborated in Agile teams, participating in sprint planning, daily stand-ups, and code reviews.

PROJECTS

Homnifi (homnifi.com)

Enterprise-grade Web3 and DeFi ecosystem delivering staking, rewards, licensing, and machine-connected blockchain services.

React.js / Node.js / MongoDB / Microservices / Redis / RabbitMQ

- Led end-to-end development of a scalable Full Stack architecture with a centralized API Gateway handling auth, routing, throttling, and service orchestration.
- Designed staking, rewards, and license-based incentive modules tightly linked to blockchain smart contracts.
- Tuned backend performance for high user concurrency using Redis caching, RabbitMQ messaging, and batch processing.

AI Farm (app.aifarm.network)

Decentralized Web3 platform enabling wallet operations, staking, referrals, and asset resale through smart contracts.

Node.js / PostgreSQL / Docker / Smart Contracts

- Assembled and deployed scalable microservices to support wallet, staking, and reward workflows, including debit, credit, token swaps, and real-time balance updates.
- Created referral-based incentive and buyback systems with smart contract integration for secondary marketplace reselling.

Aqary Dashboard (aqaryaid.com/en)

Large-scale proptech platform supporting property sales, rentals, financing, and user management across global markets.

Next.js / SSR / SEO / Node.js

- Streamlined a high-performance frontend using Next.js with SSR and SEO best practices, plus dynamic routing and advanced search.
- Improved page load speed, SEO rankings, and user engagement through code splitting and lazy loading.

Virtua Marketplace (marketplace.virtua.com)

NFT marketplace and digital asset trading platform supporting high-volume blockchain transactions.

React.js / Node.js / Web3.js / Stripe

- Integrated Ethereum-based smart contracts ensuring secure ownership, traceability, and dispute reduction.
- Rolled out Stripe payment processing for fiat-to-crypto transactions and fine-tuned performance for peak NFT launch traffic.

OFish - CRM Admin & Accounts Portal

CRM platform managing end-users, business users, IoT device registrations, and company profiles.

React.js / React Native / Node.js / IoT

- Shipped a React Native app for end-user IoT device control, plus CRM modules for role-based access and multi-organization IoT device management.

IntVue - Automated Recruitment Software (intvue.com)

AI-driven recruitment platform automating candidate screening and interview scheduling.

React.js / Node.js / WebSockets / SignalR

- Delivered responsive React.js interfaces and Node.js RESTful APIs for candidate management and scheduling, with real-time chat via WebSockets and SignalR.

EDUCATION

Bachelor of Computer Science

University of Narowal

Narowal, Pakistan | 03/2015 - 09/2019
